MONTY ANSWERS

Question:

Monty was recently asked by an equestrian magazine to give his top three tips for horse persons today. Here is the second of the three. Next week we will publish Monty's third tip. If you're curious about his number one tip, you can read it here: http://montyrobersoniversity.com/q_and_a

Answer:

My number two tip is to remind the readers that there are more educational opportunities for horse owners today than ever there has been since this old earth began to spin. After the violence is removed, the next obligation that the horse owner has, is to become educated as to the needs of their horses, training techniques, nutrition, foot care, and medical care head the list of challenges for the owner in the area of becoming fully educated.

Monty's Principles

A Note of Gratitude from Australia

Dear Monty,

This is not a question but note of thanks. I did enjoy your recent presentation here in Australia and learned a lot. I found it very intense and am amazed at your ability to concentrate, talk and walk for a whole day! The demonstrations were not only informative but also emotionally moving. It is indeed a privilege to see you working.

During the day a girl asked a question comparing your gentle handling of one horse with the firmer treatment of another and asking whether you could eventually be gentler with the strong horse. Your explanation was perfectly clear and absolutely rational. You were explaining the need for respect from your horse. I train dogs for obedience competition as well as owning horses and completely understand the herd/pack need for hierarchy.

Dogs and horses need to know where they stand and are perfectly happy when they know what is expected. The girl seemed to be unsure that the horse was "perfectly happy" with its new place. I felt for you as you tried to explain the ways of horses to a human. Some people seem to be reluctant to accept that there are differences. Being firm is not being cruel.

Thank you so much for being so generous with your time, knowledge and expertise. I have benefited and now the horses I work with will benefit too from your understanding. I love Join-Up, it makes me cry.

Yours sincerely,
Vicki M., Australia

Monty's Challenge

Test yourself each week as I challenge you to answer the question below. I mean this. Sit down and write an answer. Don't wait for my answer next week. If you have been reading my Weekly Questions and Answers for the last six months, you should be in a position to do this. Send your answer to my team at: askmonty@montyroberts.com

Why should you bother? Because it will help you focus. There is probably a comparable question in your life that needs answering - or will be. If you can gain insight into how to go about answering a practical question that is loosely related to your problem, this exercise will help you answer your nagging question. Then read my answer. I want all of my students to learn to be better trainers than me. That's good for you and good for horses!

SUCCEED: Digestive Health

"I have believed for years that digestive health has a major impact on a horse's happiness, performance and overall well-being. Just by owning and riding horses, we take them out of their natural environment. We keep them in stalls, we feed them grain, and we exercise them. All of this works against the horse's digestive health.

I also believe there is something you can do to care for your horse's digestive system. I've been using a product called SUCCEED® on my performance horses for many years now, with tremendous results." ~ Monty

[1&keywords=Horse+Sense+for+Leaders](#)

"The connection made in this book between leadership and non-violence is extremely important. Many leaders have employed violence or cruelty to achieve their ends but Monty Roberts has gone in the opposite direction and shows how true leadership is about the development of trust (whether between a human and an animal or between humans) and encouraging those around one to reach their full potential. Everybody could benefit from absorbing the practices outlined in this book."

Andrew Rowan is the Chief Scientific Officer for The Humane Society of the United States.

Premise of the book: Monty Roberts, author of The New York Times bestseller, The Man Who Listens to Horses, has cooperated with the writing of a new book, Horse Sense for Leaders. The book borrows from the fascinating life of Roberts, known as the horse whisperer, for a highly engaging look at the significance of trust-based leadership. The book blends Monty's work as a world leader of non-violent horse training with current research on the value of a trust-based leadership approach. This unique approach allows for an interesting and provocative read on how leaders can engage followers in more effective relationships at work.
