

ASK MONTY

Wednesday March 9, 2016

Greetings!

MONTY ANSWERS

Question:

If you met a person who was skeptical about your methods, and you had the chance to demonstrate one thing to them to change their mind, what would you choose to show them and why?

Answer:

My choice would be Join-Up®. Join-Up is proof that horses can trust humans and virtually all humans know that horses cannot lie.

Sincerely,
Monty

Why should you bother? Because it will help you focus. There is probably a comparable question in your life that needs answering - or will be. If you can gain insight into how to go about answering a practical question that is loosely related to your problem, this exercise will help you answer your nagging question. Then read my answer. I want all of my students to learn to be better trainers than me. That's good for you and good for horses!

~ Monty

Next Week's Question:

Dear Monty,
I love mustangs and know you do too. In light of the exceptional number of these amazing horses you've worked with, what do you love most about them? Are there certain traits that make them stand out to you among other breeds?

SUCCEED: Digestive Health

"I have believed for years that digestive health has a major impact on a horse's happiness, performance and overall well-being. Just by owning and riding horses, we take them out of their natural environment. We keep them in stalls, we feed them grain, and we exercise them. All of this works against the horse's digestive health.

I also believe there is something you can do to care for your horse's digestive system. I've been using a product called SUCCEED® on my performance horses for many years now, with tremendous results." ~ Monty

Horse Sense for Leaders: Building Trust-Based Relationships Features New York Times Best-Selling Author Monty Roberts

"The connection made in this book between leadership and non-violence is extremely important. Many leaders have employed violence or cruelty to achieve their ends but Monty Roberts has gone in the opposite direction and shows how true leadership is about the development of trust (whether between a human and an animal or between humans) and encouraging those around one to reach their full potential. Everybody could benefit from absorbing the practices outlined in this book."

Andrew Rowan is the Chief Scientific Officer for The Humane Society of the United States.

Premise of the book: Monty Roberts, author of The New York Times bestseller, The Man Who Listens to Horses, has cooperated with the writing of a new book, Horse Sense for Leaders. The book borrows from the fascinating life of Roberts, known as the horse whisperer, for a highly engaging look at the significance of trust-based leadership. The book blends Monty's work as a world leader of non-violent horse training with current research on the value of a trust-based leadership approach. This unique approach allows for an interesting and provocative read on how leaders can engage followers in more effective relationships at work.
